TRADE IN SERVICES

CONDITIONAL OFFER FROM THE EC AND ITS MEMBER STATES
(HEREINAFTER THE EC)

TRADE IN SERVICES

CONDITIONAL OFFER FROM THE EC AND ITS MEMBER STATES (HEREINAFTER THE EC)

General remarks

At the WTO Ministerial Conference in Doha in November 2001, Ministers agreed that initial offers by Members for improved specific commitments should be submitted by 31 March 2003.

In line with this decision, and committed to the objectives and principles stated in the GATS, in particular Article IV and XIX GATS, as well as the negotiating guidelines agreed by the Council for Trade in Services on 29 March 2001, and having given careful consideration to requests submitted by WTO Members, in particular Developing Countries, the EC hereby submits its offer in the framework of the ongoing services negotiations under the General Agreement on Trade in Services (GATS) and in the context of the Doha Development Agenda (DDA).

This offer is conditional on other WTO Members making substantive offers in sectors where the EU has made requests. The EC reserves the right to modify, extend or, reduce this offer in whole or in part at any time. The EC's readiness to confirm this offer will depend on its overall assessment of the acceptability of the outcome of these negotiations.

The offer covers horizontal commitments, MFN exemptions, and specific commitments in individual service sectors. This offer is based on the consolidated schedule of the EU-15 as communicated to the Council for Trade in Services by the EC on 22 April 2003 (S/DCS/W/EEC).

In this offer, the individual sectors and sub-sectors are identified in accordance with the classification list in Document MTN.GNS/W/120 or other internationally recognised classification (e.g. Financial Services Annex) and corresponding CPC number wherever possible. For computer services, the EC attached to its Schedule of commitments its proposed "Understanding on the scope of coverage of computer and related services – CPC 84", which clarifies – but does not modify – which activities are covered by CPC 84. The EC would like to recall the classification or list of activities proposed in its negotiating proposals with regard to postal and courier, and environmental services. Although discussions on classification in these sectors are still ongoing and without wishing to prejudice the outcome of these discussions, the EC has in order to clarify the scope of its proposed commitments presented its offer in these sectors in accordance with the approach set out in these proposals.

This offer cannot be construed as offering in any way the privatisation of public undertakings nor as preventing the Community and its Member States from regulating public services in order to meet national policy objectives.

The EC remains available to provide any clarification and answer any question on this conditional offer. Questions can be addressed to the European Commission via the EC GATS contact point (mailbox address: TRADE-GATS-CONTACT-POINTS@cec.eu.int), via the Delegation of the European Commission in Geneva, or directly to the European Commission (Directorate-General Trade, Unit D2 (Trade in services, including e-commerce), Brussels, B-1049, Belgium, fax 32-2-299 24 35).

GENERAL AGREEMENT

ON TRADE IN SERVICES

EUROPEAN COMMUNITIES AND THEIR MEMBER STATES

Schedule of Specific Commitments

INTRODUCTORY NOTE

1. The specific commitments in this schedule apply only to the territories in which the Treaties establishing the European Communities (EC) are applied and under the conditions laid down in these Treaties. These commitments apply only to the relations between the Communities and their Member States on the one hand, and non-Community countries on the other. They do not affect the rights and obligations of Member States arising from Community law.
2. The following abbreviations are used to indicate the Member States:
A Austria B Belgium I Italy
D Germany IRL Ireland
DK Denmark L Luxembourg
E Spain NL The Netherlands
F France FIN Finland P Portugal
GR Greece S Sweden UK United Kingdom
3. The rights and obligations arising from the GATS, including the schedule of commitments, shall have no self-executing effect and thus confer no rights directly to individual natural persons or juridical persons.
4. A glossary of terms used by individual Member States is attached to this schedule.

Modes of supply: 1) Cross-border supply 2) Consumption abroad 3) Commercial presence 4) Presence of natural persons

	3) In all EC Member States services considered as public utilities at a national or local level may be subject to public monopolies or to exclusive rights granted to private operators ¹ .	3) a) Treatment accorded to subsidiaries (of third country companies) formed in accordance with the law of a Member State and having their registered office, central administration or principal place of business within the Communities is not extended to branches or agencies established in a Member State by a third-country company. However, this does not prevent a Member State from extending this treatment to branches or agencies established in another Member State by a third-country company or firm, as regards their operation in the first Member State's territory, unless such extension is explicitly prohibited by Community law ² .	
		b) Treatment less favourable may be accorded to subsidiaries (of third-country companies) formed in accordance with the law of a Member State which have only their registered office in the territory of the Communities, unless it can be shown that they possess an effective and continuous link with the economy of one of the Member States. ³	
		<p><u>Formation of Legal Entity</u></p> <p>3) S: A limited liability company (joint stock company) may be established by one or several</p>	

¹ Explanatory Note: Public utilities exist in sectors such as related scientific and technical consulting services, R&D services on social sciences and humanities, technical testing and analysis services, environmental services, health services, transport services and services auxiliary to all modes of transport. Exclusive rights on such services are often granted to private operators, for instance operators with concessions from public authorities, subject to specific service obligations. Given that public utilities often also exist at the sub-central level, detailed and exhaustive sector-specific scheduling is not practical.

¹ Provision of legal services is only authorized in respect of public international law, EC law and the law of any jurisdiction where the service supplier or its personnel is qualified to practice as a lawyer, and, like the provision of other services, is subject to licensing requirements and procedures applicable in EC Member States. For lawyers providing legal services in respect of public international law and foreign law these may take *inter alia* the form of compliance of local codes of ethics, use of home title (unless recognition with the host title has been obtained), insurance requirements, simple registration with the host country Bar or a simplified admission to the host country Bar through an aptitude test.. Legal services in respect of EC law shall in principle be carried out by or through a fully qualified lawyer admitted to a Bar in the EC acting personally, and legal services in respect of the law of a Member State of the EC shall in principle be carried out by or through a fully qualified lawyer admitted to the Bar in that Member State acting personally. Full admission to the Bar in the relevant EC Member State might therefore be necessary for representation before courts and other competent authorities in the EC since it involves practice of EC and national procedural law.

¹ While discussions on classification in this sector are still ongoing, the commitment is listed according to the proposed classification that has been notified to WTO by the EC and its Member States on 23 March 2001 (WTO document S/CSS/W/61), without prejudice to the outcome of the discussion on the classification of postal and courier services. In addition, the EC recalls its readiness to define and make negotiated additional commitments in this sector. These commitments should be summed up in a reference paper on postal and courier services.

² The term “handling” should be taken to include clearance, sorting, transport and delivery.

³ “Postal item” refers to items handled by any type of commercial operator, whether public or private.

7. FINANCIAL SERVICES SECTOR¹			

¹ Unlike foreign subsidiaries, branches established directly in a Member State by a non-Community financial institution are not, with certain limited exceptions, subject to prudential regulations harmonised at Community level which enable such subsidiaries to benefit from enhanced facilities to set up new establishments and to provide cross-border services throughout the Communities. Therefore, such branches receive an authorisation to operate in the territory of a Member State under conditions equivalent to those applied to domestic financial institutions of that Member State, and may be required to satisfy a number of specific prudential requirements such as, in the case of banking and securities, separate capitalisation and other solvency requirements and reporting and publication of accounts requirements or, in the case of insurance, specific guarantee and deposit requirements, a separate capitalisation, and the localisation in the Member State concerned of the assets representing the technical reserves and at least one third of the solvency margin. NOTES TO THE SECTION ON INTERNATIONAL MARITIME TRANSPORT SERVICES

Where road, rail, inland waterways (and) (related) (auxiliary) services are not otherwise fully covered this schedule, a multimodal transport operator (as defined below –3) shall have the ability to rent or lease trucks, railway carriages or barges, and related equipment, for the purpose of inland forwarding of cargoes, or have access to, and use of, these forms of multimodal activities on reasonable and non-discriminatory terms and conditions for the purpose of carrying out multimodal transport operations. (« Reasonable and non-discriminatory terms and conditions » mean, for the purpose of this [additional] commitment the ability of the multimodal transport operator to arrange for the conveyance of its merchandise on a timely basis, including priority over other merchandise which has entered the port at a later date).

DEFINITIONS

1. Without prejudice to the scope of activities which may be considered as « cabotage » under the relevant national legislation, this schedule does not include « maritime cabotage services », which are assumed to cover transportation of passengers or goods between a port located in a Member State and a port located in the same Member State, and transportation of passengers or goods between a port located in a Member State and installations or structures situated on the continental shelf of this Member State.

2. « Other forms of commercial presence for the supply of international maritime transport services » means the ability for international maritime transport service suppliers of other Members to undertake locally all activities which are necessary for the supply to their customers of a partially or fully integrated transport service, within which the maritime transport constitutes a substantial element. (This commitment shall however not be construed as limiting in any manner the commitments undertaken under the cross-border mode of delivery).

These activities include, but are not limited to:

(a) marketing and sales of maritime transport and related services through direct contact with customers, from quotation to invoicing, these services being those operated or offered by the service supplier itself or by service suppliers with which the service seller has established standing business arrangements;

(b) the acquisition, on their own account or on behalf of their customers (and the resale to their customers) of any transport and related services, including inward transport services by any mode, particularly inland waterways, road and rail, necessary for the supply of the integrated services;

(c) the preparation of documentation concerning transport documents, customs documents, or other documents related to the origin and character of the goods transported;

(d) the provision of business information by any means, including computerised information systems and electronic data interchange (subject to the provisions of the annex on telecommunications);

(e) the setting up of any business arrangements (including participation in the stock of a company) and the appointment of personnel recruited locally (or, in the case of foreign personnel, subject to the horizontal commitment on movement of personnel) with any locally established shipping agency;

(f) acting on behalf of the companies, organising the call of the ship or taking over cargoes when required.

3. « Multimodal transport operator » means the person on whose behalf the bill of lading /multimodal transport document, or any other document evidencing a contract of multimodal carriage of goods, is issued and who is responsible for the carriage of goods pursuant to the contract of carriage.

4. « Maritime cargo handling services » means activities exercised by stevedore companies, including terminal operators, but not including the direct activities of dockers, when this workforce is organised independently of the stevedoring or terminal operator companies. The activities covered include the organisation and supervision of:

- the loading/discharging of cargo to/from a ship;

- the lashing/unlashing of cargo;

- the reception/delivery and safekeeping of cargoes before shipment or after discharge.

5. « Customs clearance services » (alternatively « customs house brokers' services ») means activities consisting in carrying out on behalf of another party customs formalities concerning import, export or through transport of cargoes, whether this service is the main activity of the service provider or a usual

complement of its main activity.

6.« Container station and depot services » means activities consisting in storing containers, whether in port areas or inland, with a view to their stuffing/stripping, repairing and making them available for shipments.

7.« Maritime agency services » means activities consisting in representing, within a given geographic area, as an agent the business interests of one or more shipping lines or shipping companies, for the following purposes:

- marketing and sales of maritime transport and related services, from quotation to invoicing, and issuance of bills of lading on behalf of the companies, acquisition and resale of the necessary related services, preparation of documentation, and provision of business information;

- acting on behalf of the companies organising the call of the ship or taking over cargoes when required.

8.« Freight forwarding services » means (the activity consisting of organising and monitoring shipment operations on behalf of shippers, through the acquisition of transport and related services, preparation of documentation and provision of business information).

9. Movement of equipment. Transportation between a port located in a Member State and a port located in another Member State is open. In addition, International maritime transport suppliers can move/reposition their own equipment (i.e. empty containers, flatbeds etc.) on their vessels between ports in a Member State of the EC when no revenue is involved, except for:

- A, L where not applicable.

10. Feeder services. Transportation between a port located in a Member State and a port located in another Member State is open. In addition, international maritime transport suppliers can operate vessels of any flag for the purposes of pre- and onward carriage of their own containerised international cargo between ports in a Member State of the EC, except for:

- A L where not applicable and;

- D, E, F, FIN, GR, I, P and S by authorisation only.

ADDITIONAL COMMITMENT BY THE EUROPEAN COMMUNITIES
AND THEIR MEMBER STATES

SCOPE:

The following are definitions and principles on the regulatory framework for the basic telecommunications services underpinning the market access commitments by the European Communities and their Member States.

DEFINITIONS:

User mean service consumer and service suppliers.

Essential facilities mean facilities of a public telecommunications transport network and service that

- a) are exclusively or predominantly provided by a single or limited number of suppliers; and
- b) cannot feasibly be economically or technically substituted in order to provide a service.

A *major supplier* is a supplier which has the ability to materially affect the terms of participation (having regard to price and supply) in the relevant market for basic telecommunications services as a result of:

- a) control over essential facilities; or
- b) use of its position in the market.

1. COMPETITIVE SAFEGUARDS:

1.1. Prevention of anti-competitive practices in telecommunications:

Appropriate measures shall be maintained for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices.

1.2. Safeguards:

The anti-competitive practices referred to above shall include in particular:

- a) engaging in anti-competitive cross-subsidization;
- b) using information obtained from competitors with anti-competitive results; and
- c) not making available to other services suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

2. INTERCONNECTION:

2.1. This section applies to linking with suppliers providing public telecommunications transport networks or services in order to allow the users of one supplier to communicate with users of another supplier and to access services provided by another supplier.

2.2. Interconnection to be ensured:

Within the limits of permitted market access, interconnection with a major supplier will be ensured at any technically feasible point in the network. Such interconnection is provided¹:

- a) under non-discriminatory terms, conditions (including technical standards and specifications) and rates and of a quality no less favourable than that provided for its own like services or for like services of non-affiliated service suppliers or for its subsidiaries or other affiliates²;
- b) in a timely fashion, on terms, conditions (including technical standards and specifications) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
- c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.

¹Suppliers of services or networks not generally available to the public, such as closed user groups, have guaranteed rights to connect with the public telecommunications transport network or services on terms, conditions and rates which are non-discriminatory, transparent and cost-oriented. Such terms, conditions and rates may, however, vary from the terms, conditions and rates applicable to interconnection between public telecommunications networks or services.

²Different terms, conditions and rates may be set in the Communities for operators in different market segments, on the basis of non-discriminatory and transparent national licensing provisions, where such differences can be objectively justified because these services are not considered "like services".

2.3. Public availability of the procedures for interconnection negotiations :

The procedures applicable for interconnection to a major supplier will be made publicly available.

2.4. Transparency of interconnection arrangements:

It is ensured that a major supplier will make publicly available either its interconnection agreements or a reference interconnection offer.

2.5. Interconnection : dispute settlement:

A service supplier requesting interconnection with a major supplier will have recourse, either :

- a) at any time or
- b) after a reasonable period of time which has been made publicly known to an independent domestic body, which may be a regulatory body as referred to in paragraph 5 below, to resolve disputes regarding appropriate terms, conditions and rates for interconnection within a reasonable period of time, to the extent that these have not been established previously.

3. UNIVERSAL SERVICE:

Any Member has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Member.

4. PUBLIC AVAILABILITY OF LICENSING CRITERIA:

Where a licence is required, the following will be made publicly available:

- a) all the licensing criteria and the period of time normally required to reach a decision concerning an application for a licence and
- b) the terms and conditions of individual licences.

The reasons for the denial of a licence will be made known to the applicant upon request.

5. INDEPENDENT REGULATORS:

The regulatory body is separate from, and not accountable to, any supplier of basic telecommunications services. The decisions of and the procedures used by regulators shall be impartial with respect to all market participants.

6. ALLOCATION AND USE OF SCARCE RESOURCES:

Any procedures for the allocation and use of scarce resources, including frequencies, numbers and rights of way, will be carried out in an objective, timely, transparent and non-discriminatory manner. Understanding on the scope of coverage of CPC 84 - Computer and Related Services

(i) CPC 84 covers the basic functions used to provide all computer and related services: computer programs defined as the sets of instructions required to make computers work and communicate (including their development and implementation), data processing and storage, and related services, such as consultancy and training services for staff of clients. Technological developments have led to the increased offering of these services as a bundle or package of related services that can include some or all of these basic functions. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.

(ii) Computer and related services, regardless of whether they are delivered via a network, including the Internet, include all services that provide:

- consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance, or management of or for computers or computer systems; or
- computer programs defined as the sets of instructions required to make computers work and communicate (in and of themselves), plus consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for computer programs; or
- data processing, data storage, data hosting or database services; or
- maintenance and repair services for office machinery and equipment, including computers; or,
- training services for staff of clients, related to computer programs, computers or computer systems, and not elsewhere classified.

(iii) **Computer and related services** enable the provision of other services (e.g., banking) by both electronic and other means. However, there is an important distinction between the enabling service (e.g., web-hosting or application hosting) and the content or core service that is being delivered electronically (e.g., banking). In such cases, the content or core service is not covered by CPC 84.
